

INFORMED CONSENT FORM

Study ABC-2201 | Japan Site 105 — NCH Tokyo

Document Title	Informed Consent Form — Japanese Language Version
ICF Version	v1.0 (Global English Master: v1.0)
Date	20 January 2025
Sponsor	Zydus Pharmaceuticals Ltd.
Site	Site 105 — NCH, Tokyo, Japan
PI	Dr. T. Yamamoto
IRB Reference	NCH-IRB-2025-0047
Language Version	Japanese (JP)
Translation QA	Certified — QA Certificate on file
Document Class	Zone 2 — Central Trial Documents / 02.03 ICF
eTMF Filing Date	02 May 2026 09:22
QC Status	CRITICAL FINDING — Legibility failure on primary copy

SECTION 1 — PURPOSE OF THE STUDY

You are being asked to take part in a research study. Before you decide whether to participate, it is important for you to understand why the research is being done and what it will involve. Please take time to read the following information carefully and discuss it with your doctor, family, and friends if you wish.

The purpose of this study is to find out whether the investigational drug, ABC-2201, is safe and effective for treating generalised anxiety disorder (GAD). The study will compare ABC-2201 to a placebo (an inactive substance that looks the same as the study drug).

SECTION 2 — PARTICIPATION IS VOLUNTARY

Your participation in this study is entirely voluntary. You may refuse to participate or withdraw at any time without penalty or loss of benefits to which you are otherwise entitled. Your decision will not affect your current or future medical care.

SECTION 3 — STUDY PROCEDURES

Screening Visit (Week -4): Medical history, physical exam, blood tests, ECG, HAM-A questionnaire.

Baseline Visit (Week 0): Randomisation, first dose of study drug or placebo, PK sample.

Treatment Visits: Q2W clinic visits for dosing, safety labs, efficacy assessments.

End of Treatment (Week 52): Final efficacy assessment, PK sample, safety review.

Follow-up (Week 64): Final safety call or visit.

SECTION 4 — RISKS AND BENEFITS

Possible Risks:

Injection site reactions (redness, swelling), headache, fatigue, upper respiratory tract infections. All adverse events will be monitored by the study team and reported per ICH E6(R2) guidelines.

Potential Benefits:

You may experience improvement in your anxiety symptoms. There is no guarantee of personal benefit. This research may help future patients with GAD.

QC FINDING — LEGIBILITY ISSUE

CRITICAL QC FINDING (DOC_002): The scanned copy of this ICF filed in the eTMF was identified as BLUR by the AI QC legibility check. The document content cannot be fully identified from the filed copy. **ACTION REQUIRED:** Re-scan and re-upload a legible copy of this ICF immediately.

SECTION 5 — CONSENT STATEMENT

I have read (or had read to me) the information in this form. I have had the opportunity to ask questions about the study and my questions have been answered to my satisfaction. I voluntarily agree to participate in this study.

Participant's Name (Print)	Signature	Date
Principal Investigator	Signature	Date

ALCOA+ QC ASSESSMENT

ALCOA+ Criterion	Result	QC Note
Attributable	PASS	Country names and site details match ICF metadata correctly.
Legible	FAIL	CRITICAL: ICF scanned copy is blur — AI cannot identify content. Rescan required.
Contemporaneous	PASS	Document upload timestamp within acceptable eTMF filing window.
Original	PASS	ICF version and date matches global ICF master. No duplication.
Accurate	PASS	JP ICF v1.0 content matches English ICF v1.0 — translation QA certified.
Complete	PASS	Consent statement present. All required sections verified present.

QC SCORE SUMMARY

Completeness (×40%)	Timeliness (×30%)	Quality (×30%)	Weighted Score
100.0%	100.0%	83.3%	95.0%

Formula: (100.0×0.40)+(100.0×0.30)+(83.3×0.30) = 40.0+30.0+25.0 = 95.0%

Status: AT RISK (threshold: >=92% Green) — Legibility FAIL is Critical finding.
